1 The ASCEND IV language syntax and semantics 1

1.1 PRELIMINARIES 2

ASCEND is cAsE sensitive! 2

1.1.1 Punctuation 2

keywords: 2

Minor items: 2

3: 3

4 3

4+ 3

LHS: 3

RHS: 3

Simple Names: 3

Compound names: 3

Groupings: 3

« » 3

(* *) 3

( ) 3

{ } 3

[ ] 4

. 4

.. 4

: 4

:: 4

; 4

1.1.2 Basic Elements 4

Boolean value 4

Integer value 4

Real value 4

Reals stored in SI units 5

Dimensionality: 5

L 5

M 5

T 5

E 5

Q 5

TMP 5

LUM 5

P 5

S 5

C 6

Unit expression 6

Units 6

Symbol Value 7

Sets values 7

Arrays 8

Arrays can be jagged 9
Index variable 9
Label: 9
Lists 10
1.1.3 **Basic Concepts** 10
Instances and types 10
Implicit types 11
Instantiation 11
1.2 DATA TYPE DECLARATIONS 13
Type qualifiers: 13
UNIVERSAL **13**
1.2.1 **Models** 13
MODEL **13**
Simple models: 13
foo **13**
bar **14**
Parameterized Models 14
column(n,s) **14**
flowsheet **14**
1.2.2 **Sets** 15
Set Declaration: 15
:== **15**
Set Operations 15
UNION(list) **15**
+ **15**
INTERSECTION() **15**
***** **15**
Set difference: 16
- **16**
CARD(set) **16**
CHOICE(set) **16**
1.2.3 **Constants** 16
real_constant **16**
CONSTANT declaration example: 17
integer_constant **17**
symbol_constant **17**
boolean_constant **17**
Setting constants 17
:== **17**
1.2.4 **Variables** 17
ATOM **17**
DEFAULT, DIMENSION, and DIMENSIONLESS **18**
real **18**
integer **18**
boolean **18**
symbol **18**

Setting variables 19
:= 19
Tabular assignments 19
DATA 19
20
1.2.5 Relations 20
Mathematical expression: 20
Numerical relations 20
Relational operators: 21
=, >=, <=, <, >, <> 21
MAXIMIZE, MINIMIZE 21
Binary Operators: 21
+ 21
- 21
* **21**
/ 21
^ 21
Unary Operators: 21
- 21
function() 21
Real functions of lists: 21
SUM(list) 22
Empty sum() yields wild 0. 22
PROD(list) 22
Possible future functions: 22
MAX(list) 22
MIN(list) 22
1.2.6 Derivatives in relations (* 4+ *) 23
1.2.7 External relations 23
1.2.8 Conditional relations (* 4+ *) 23
1.2.9 Logical relations (*4+*) 23
Logical expression 23
1.2.10 Explanations (* 4+ *) 23
1.3 DECLARATIVE STATEMENTS 24
Statements 24
Compound statements 24
CASE statements coming eventually 24
ASCEND operator synopses: 24
IS_A 24
ALIASES (* 4+ *) 24
WILL_BE (* 4+ *) 24
IS (* 4+ *) 25
ARE_THE_SAME 25
ARE_ALIKE 25
IS_REFINED_TO 25
ARE_CONNECTED (*4+*) 25

FOR/CREATE **25**
Operators in detail: 25
IS_A statement **25**
ALIASES (* 4+ *) **26**
WILL_BE (* 4+ *) **27**
IS (* 4+ *) **27**
IS_REFINED_TO **27**
ARE_THE_SAME **28**
ARE_ALIKE **30**
ARE_CONNECTED (*4+*) **31**
FOR/CREATE **31**
1.4 PROCEDURAL STATEMENTS 32
METHODS **32**
Initialization routines: 32
METHOD **32**
Procedural assignment 32
FOR/DO statement **33**
IF **33**
SWITCH **33**
CALL **33**
RUN **33**
Type access to methods: 34
1.5 MISCELLANY 35
1.5.1 Variables for solvers 35
solver_var **35**
Attributes: 35
lower_bound **35**
upper_bound **35**
nominal **35**
fixed **35**
generic_real **35**
Kluges for MILPs 35
solver_semi, solver_integer, solver_binary **36**
Kluges for ODEs 36
ivpsystem.lib **36**
1.5.2 Supported attributes 36
(* 4+ *) **36**
1.5.3 Single operand real functions: 36
exp() **36**
ln() **37**
sin() **37**
cos() **37**
tan() **37**
arcsin() **37**
arccos() **37**
arctan() **37**

erf() **37**
sinh() **37**
cosh() **37**
tanh() **37**
arcsinh() **37**
arccosh() **37**
arctanh() **37**
lnm() **37**
Discontinuous functions: 38
abs() **38**
1.5.4 Logical functions 38
SATISFIED() (*4+*) **38**
1.5.5 Units 38
1.5.5.1 DEFINE THE SYSTEM UNITS IN SI MKS system 38
1.5.5.2 distance 39
1.5.5.3 mass 39
1.5.5.4 time 40
1.5.5.5 molecular quantities 40
1.5.5.6 temperature 41
1.5.5.7 money 41
1.5.5.8 reciprocal time (frequency) 41
1.5.5.9 area 41
1.5.5.10 volume 41
1.5.5.11 force 42
1.5.5.12 pressure 42
1.5.5.13 energy 42
1.5.5.14 power 42
1.5.5.15 absolute viscosity 43
1.5.5.16 electric charge 43
1.5.5.17 misc. electro-magnetic fun 43
1.5.5.18 numeric constants of some interest 44
1.5.5.19 constant based conversions 45
1.5.5.20 subtly dimensionless measures 45
1.5.5.21 light quantities 45
1.5.5.22 misc. rates 45
1.5.5.23 time variant conversions 45
1.6 GRAMMAR 47
1.6.1 FLEX definitions 47
1.6.2 YACC definitions 47
